

ANDERS TECHNOLOGY

CYBERSECURITY SERVICES

You need to know your business is secure. Security issues can cause disruption to your operations, ruin your reputation, and could hold your data hostage. New cyber-threats are emerging constantly, so how can you protect your business today and tomorrow? Our Cybersecurity Services offer layers of protection that can be easily scaled to your organization's evolving risk profile and budget.

IS THIS YOUR CURRENT SITUATION?

Every time you hear about another security breach, does it make you wonder about the security of your data? You have a firewall and antivirus, but is that enough?

THE ANDERS SOLUTION

Through our Cybersecurity Services, Anders Technology offers a layered security approach with multiple safeguards so your business and employees stay productive and secure. We provide personalized and continuous cybersecurity monitoring best suited to each company's needs, whether on-premise or in the cloud.

CYBERSECURITY SERVICES

During an initial assessment, we will evaluate your level of security currently and recommend services to create an all-encompassing, layered approach to protect your business.

CYBERSECURITY ENHANCEMENTS FOR CURRENT OFFICE 365 USERS

If you already utilize Microsoft Office 365, Anders Technology can help you take advantage of existing features to improve your cybersecurity initiatives by:

- Identifying login attempts scored as “risky” to inform you of the potential for a network breach
- Monitoring Advanced Threat Protection (ATP) for identifying threats to your environment
- Applying a security score to your O365 account to highlight areas for improvement
- Enabling parameters to limit access based on geographic location to only allow locations or specific employees network access

“Through our Cybersecurity Services, we offer a layered security approach that can easily be scaled to your organization’s evolving risk profile and budget.”
