

MANAGED SECURITY SERVICES

Keeping your business protected from evolving cybersecurity threats is our top priority. With increased cybersecurity threats impacting companies every day, we stay on top of the latest security measures to keep your business from being another statistic.

IS THIS YOUR CURRENT SITUATION?

TRADITIONAL MANAGED TECHNOLOGY SERVICES

- Antivirus
- Patching
- Monitoring

HACKERS EVOLVED. HAVE YOU?

Anders Technology is focused on modern managed services with an increased emphasis on continuous monitoring and advanced cybersecurity measures.

MODERN MANAGED TECHNOLOGY SERVICES

- Antivirus
- Patching
- Monitoring
- 24x7x365 Security Monitoring
- Cyber Awareness Training
- Configuration Monitoring
- Application Whitelisting/Zero Trust Application Control

THE ANDERS SOLUTION

Staying on top of the latest cybersecurity threats and sophisticated tactics hackers use to infiltrate businesses is an ongoing responsibility – and one we’re passionate about. In order to protect you against modern ransomware threats and add value to your business, we include 24/7 monitoring and protection in both of our Standard and Premium managed services packages.

STANDARD MANAGED SERVICES

Covers what your business needs for proactive monitoring and security of servers and workstations, including:

- Microsoft and third-party patches
- 24/7/365 antivirus and cybersecurity monitoring of computers and servers
- Basic network, server and storage maintenance and administration
- O365 Experts and Professionals, Cisco Meraki, Microsoft Azure and VMware

PREMIUM MANAGED SERVICES

Includes everything in Standard Managed Services, plus:

- Virtual CIO and CISO-level advisory
- Personalized technology strategy and budget planning

CYBERSECURITY STRATEGY AND TRAINING

Protecting your business from evolving cyber threats is vital in preventing a costly data breach. Acting as a virtual Chief Information Security Officer (vCISO), our technology advisors work with companies on all stages of cybersecurity, from developing a strategy to training staff and more, including:

- Cybersecurity architecture and strategy
- Governance, risk and compliance
- Vulnerability management
- Information protection and privacy
- Cybersecurity training and testing

CYBERSECURITY ENHANCEMENTS FOR CURRENT OFFICE 365 USERS

If you already utilize Microsoft Office 365, Anders Technology can help you take advantage of existing features to improve your cybersecurity initiatives by:

- Identifying login attempts scored as “risky” to inform you of the potential for a network breach
- Monitoring Advanced Threat Protection (ATP) for identifying threats to your environment
- Applying a security score to your O365 account to highlight areas for improvement
- Enabling parameters to limit access based on geographic location to only allow locations or specific employees network access

“Our cybersecurity managed services offer a layered security approach that can easily be scaled to your organization’s evolving risk profile and budget.”
