

ANDERS HEALTH CARE

STATE LICENSING BOARD SERVICES

Applying for a medical, nursing, physician assistant or other provider license is a complex and time-consuming process. With more and more professional development and licensing opportunities for health care professionals today, outsourcing the licensing process can help medical professionals advance in their careers while focusing on what matters most – their patients.

THE ANDERS SOLUTION

Anders Health Care advisors are experienced in managing all professional licensing needs including state, controlled substance and DEA applications in all 50 states. We understand the ins-and-outs of the specific state requirements, and the methodologies to expedite and streamline procedures for our clients. We do the leg work by collecting all of the credential verifications required to complete the license application using the appropriate process outlined by the state licensing board, whether an online portal or paper application and ensure timely submission. As a cost-effective licensing solution, we handle the administrative burden so your team can focus on growing your organization and providing the best patient care.

OUR HEALTH CARE ADVISORS:

Stay up-to-date with changing requirements and forms to alleviate the burden on providers

Complete license applications efficiently and correctly to save providers valuable time

Ensure that providers remain compliant with all licensing laws to streamline the overall process

OUR PROCESS: LICENSING APPLICATIONS

When working with Anders, we expedite the process by preparing and completing your application and submitting it to the appropriate state licensing board. We also complete all required third-party verifications, submit them to the appropriate credentialing entity and follow up until all items are received by the board. With a focus on transparency, our team provides continuous communication with the board for updates and to the provider until the board renders a licensing decision. Our advisors stay on top of recurring license and DEA registration renewals so the provider has peace of mind that their licenses/registrations remain active.

OUR PROCESS: CONTINUING EDUCATION

A state licensing board has the authority to require copies of all continuing education certificates. While it is the responsibility of the provider to obtain all certificates for completion of continuing education, our advisors contact the provider on a regular basis to stay on top of their state's continuing education requirements.

ABOUT ANDERS HEALTH CARE

Anders Health Care is the health care specialty group of Anders CPAs + Advisors. We provide creative, yet practical, solutions to handle the balancing act required to succeed in today's health care environment. Our comprehensive view of the health care industry recognizes how everything you do in your organization impacts your bottom line.

EFFICIENT, EFFECTIVE, ECONOMICAL

When you engage Anders, we'll always be right by your side to answer your questions and help drive smart, informed decisions. You'll have direct access to our health care leaders and our entire team of industry advisors. In addition to this service, we also offer extensive, multidisciplinary financial and advisory services for physicians, hospitals, medical centers, home health organizations, nursing homes and other facilities, from individual practices to multi-location health systems.

Partnering with an experienced advisory firm to make informed business decisions is important. The health of your organization depends on it. We understand the health care industry and offer valuable insights on a wide range of issues that impact the growth and visibility of your organization.
