

# PROTECTING PATIENT PRIVACY AND PROVIDING SCALABLE SOLUTIONS FOR ST. LOUIS MEDICAL CLINIC

Anders worked with the St. Louis Medical Clinic to replace outdated equipment and augment in-house IT staff with specialized professionals to create a more secure and efficient technology environment.

## GROWING PAINS

- ▶ As their organization grew, St. Louis Medical Clinic found that they had outpaced their previous provider's capacity and expertise
- ▶ Operating systems were nearing or at end-of-life date but still running critical lines of business operations, with network hardware too old to keep up with the demands of staff
- ▶ An increase in remote workers necessitated more secure connectivity to protect end users both on-premise and in the cloud
- ▶ To ensure compliance with HIPAA, they needed a partner familiar with health care regulations guiding privacy protection

## THE ANDERS TECHNOLOGY SOLUTION

- ▶ Anders Technology advisors installed a new Meraki core network to ensure St. Louis Medical Clinic's users could work without technological disruptions
- ▶ To improve performance and email security, advisors migrated St. Louis Medical clinic's email to Microsoft 365
- ▶ VPN capabilities were upgraded for remote end users to securely connect to the network
- ▶ Advisors remediated end of life operating systems with a migration to Azure
- ▶ Anders Technology advisors devised a strategic plan to augment St. Louis Medical Clinic's existing staff with experienced, specialized professionals
- ▶ As St. Louis Medical Clinic's needs changed over the course of their partnership with Anders, the strategic plan evolved accordingly to continue providing the necessary level of support
